3. AERODROME OPERATING MINIMA

- MDA/MDH and, DH/DA are shown in feet.
- RVR visibility values are charted only when the value is not the same as the prevailing visibility value. When a difference occurs, the respective RVR and prevailing visibility values are prefixed with "RVR" and "VIS". When there is no difference, the minimum is shown only once and means either RVR (if RVR is reported for that runway) or visibility if measured otherwise.
 - When RVR and visibility values are the same, it is indicated as "800 m".
 - When RVR and visibility values are not the same, it is indicated as "RVR 800 m VIS 1 600 m".
