

RKPK AD 2.1 AERODROME LOCATION INDICATOR AND NAME

RKPK - BUSAN / Gimhae International

RKPK AD 2.2 AERODROME GEOGRAPHICAL AND ADMINISTRATIVE DATA

1	ARP coordinates and site at AD	351050N 1285617E 004° / 1 706 m from THR 36L
2	Direction and distance from city	277° / 12 km from Busan City Hall
3	Elevation/Reference temperature	4 m / 31.5 °C
4	Geoid undulation at AD ELEV PSN	29 m
5	Magnetic variation/Annual change	8° W (2020) / 0.09° increasing
6	Aerodrome Operator, Address, Telephone, Telefax, AFS	Busan Regional Office of Aviation Ministry of Land, Infrastructure and Transport 108, Gonghangjinip-ro, Gangseo-gu, Busan, 46718 Republic of Korea Tel : +82-51-974-2214 ~5 Telefax : +82-51-974-2216 AFS : RKPKZPZX
7	Types of traffic permitted(IFR/VFR)	IFR/VFR
8	Remarks	Military Air Base

RKPK AD 2.3 OPERATIONAL HOURS

1	Aerodrome Operator	2100-1400 UTC
2	Customs and Immigration	HO
3	Health and Sanitation	HO
4	AIS Briefing Office	H24
5	ATS Reporting Office	H24
6	MET Briefing Office	H24
7	ATS	H24
8	Fuelling	HO
9	Handling	HO
10	Security	HO
11	De-icing	2000-1400 UTC
12	Remarks	

RKPK AD 2.4 HANDLING SERVICES AND FACILITIES

1	Cargo handling facilities	Available by arrangement
2	Fuel/oil types	Jet A-1 Oil : ESS0-2380 / TURBO-750 / 274MIL5606
3	Fuelling facilities/capacity	Jet A-1 available by hydrant refueling on passenger and cargo apron, at rate of 1 000 gpm. 4 Aircraft can be fueled simultaneously, total amount of storage is 6 201 000 liters. No limitation at any time service available.
4	De-icing facilities	Available. Location of de-icing pad : G8 Taxiway, G9 Taxiway, ACFT Stand NR. 26, ACFT Stand NR. 27
5	Hangar space for visiting aircraft	NIL
6	Repair facilities for visiting aircraft	NIL
7	Remarks	NIL

RKPK AD 2.5 PASSENGER FACILITIES

1	Hotels	Near AD and in Busan city
2	Restaurants	At AD and in Busan city
3	Transportation	Light rail, Buses, Taxis, and rental cars available at AD
4	Medical facilities	a. First aid emergency medical center at AD b. Ambulance service available c. Hospital in Busan city
5	Bank and Post Office	Available at AD
6	Tourist Office	Available at AD
7	Remarks	http://www.airport.co.kr/mbs/gimhae/

RKPK AD 2.6 RESCUE AND FIRE FIGHTING SERVICES

1	AD Category for fire fighting	Category 9
2	Rescue equipment	- 10 Chemical Fire Fighting Trucks - Water : 65 000 L - AFFF* : 7 800 L - Dry Chemical: 750 kg - 4 Ambulance Cars
3	Capability for removal of disabled aircraft	Specialized aircraft recovery equipment available for up to and including B747-400 size aircraft. 100 ton hydraulic recovery jack, 330 ton crane and other accessory equipment can be provided by airlines and agencies. Korea Airports Corporation is the co-ordinator for the removal of disabled aircraft and can be reached at Tel +82-51-974-3411, Airport Duty Manager.
4	Remarks	* Aqueous Film Forming Foam (AFFF)

RKPK AD 2.7 SEASONAL AVAILABILITY-CLEARING

1	Type of clearing equipment	a. ROKAF * : 1 SE - 88 (Snow removal truck) 2 Snow Ploughs and 2 graders b. KAC ** : 1 Towed Runway Jet Sweeper 3 Compact Runway Jet Sweepers 1 Multipurpose snow removal truck 1 Snow Blower
2	Clearance priorities	1. Runway in use 2. Taxiway serving runway in use 3. Apron
3	Remarks	Snow clearance information promulgated by SNOWTAM. * Republic of Korea Air Force(ROKAF) ** Korea Airports Corporation(KAC)

Change : Information of rescue equipment and clearing equipment.

RKPK AD 2.8 APRONS, TAXIWAYS AND CHECK LOCATIONS / POSITIONS DATA

1	Designation, Apron surface and strength	a. Area : 404 251 m ² b. Surface : Asphalt - International 1 and Domestic : Concrete - International 2 : c. Strength : PCN 74/F/B/X/T - International 1 : PCN 67/F/A/X/T - Domestic : PCN 109/R/C/W/T - International 2 :			
2	Designation, Taxiway width, surface and strength	Taxiway	Width(m)	Surface	Strength
		P, E1, E2, E3, E4, E5	30	Concrete	PCN 109/R/C/W/T
		S	30	Concrete	PCN 85/R/B/W/T
		C1, C2, C3, C4, C5, C6, C7	30	Concrete	PCN 85/R/B/W/T
		G7	23	Concrete	PCN 109/R/C/W/T
		G8	45	Concrete	PCN 109/R/C/W/T
		G9	78	Concrete	PCN 109/R/C/W/T
		W2	30	Concrete	PCN 55/R/B/X/T
		W3	45	Concrete	PCN 55/R/B/X/T
		G10	44	Asphalt	PCN 67/F/A/X/T
				Concrete	PCN 109/R/C/W/T
		G11	44	Asphalt	PCN 55/F/B/X/T
				Concrete	PCN 109/R/C/W/T
3	Altitude checkpoint location and elevation	All Aprons / 2 m (8 ft)			
4	VOR checkpoints	VOR : NIL			
5	INS checkpoints	INS : Every specified aircraft stands (Refer to Aircraft Parking/Docking Chart)			
6	Remarks	Military Run-up area exits on TWY E1 and E5			

RKPK AD 2.9 SURFACE MOVEMENT GUIDANCE AND CONTROL SYSTEM AND MARKINGS

1	Use of aircraft stand ID signs, TWY guide lines and visual docking/parking guidance system of aircraft stands	a. Taxiing guidance signs are the intersections of all TWY and RWY and holding positions b. Guide lines at apron c. Nose-in guidance at aircraft stands
2	RWY and TWY markings and LGT	a. RWY 1) Lights RWY 18R : Edge(HIRL), CL, THR, END, RTIL RWY 36L : Edge(HIRL), CL, THR, END, TDZ RWY 18L : Edge(HIRL), CL, THR, END, RTIL RWY 36R : Edge(HIRL), CL, THR, END, TDZ 2) Marking RWY 18R : Designation, Aiming Point, Side Strip, CL, TDZ, Displaced THR RWY 36L : Designation, Aiming Point, Side Strip, CL, TDZ, THR RWY 18L : Designation, Aiming Point, Side Strip, CL, TDZ, THR RWY 36R : Designation, Aiming Point, Side Strip, CL, TDZ, THR b. TWY 1) Lights Edge : All TWY CL : All TWY EXC W1, W2, W3 2) Marking Edge : All TWY CL : All TWY Holding Position : All RWY/TWY intersection
3	Stop bars	Refer to Aerodrome Ground Movement Chart (AD Chart 2-5/2-6)
4	Remarks	NIL

Change : Information of apron area(405 337 m² → 404 251 m²).

Remarks					
1. Obstacles					
- RWY supervisor Units are east side of RWY 36R/18L.					
- MA-1A Aircraft Arresting Nets are located at RWY 36R/18L threshold (AGL 1.0 m).					
- Aircraft Braking System Equipment Shelters are located at 528 m from the RWY 36R threshold, 714 m from the RWY 18L threshold and each side of the RWY, 83 m from the center line (AGL 2.7 m).					
- Aircraft Braking System Arresting Cable Banks are located on 528 m from the RWY 36R threshold and 714 m from the RWY 18L threshold (AGL 0.4 m).					
- Military fence is located 130 m west side of RWY 36L Center line and 1 950 ~ 2 210 m from the RWY threshold, (AGL 2.7 m).					
2. Caution					
- Mountainous area in the north of airport : Refer to Instrument Approach Charts.					
- RWY 18L is lack of runway and safety area length 4 m.					

RKPK AD 2.11 METEOROLOGICAL INFORMATION PROVIDED

1	Associated MET Office	Gimhae Airport Weather Office (Tel : +82-51-941-0365, Fax : +82-51-941-0366)
2	Hours of service MET Office outside hours	24 hours -
3	Office responsible for TAF preparation Periods of validity	ROKAF(Republic of Korea Airforce) MET Office 30 hours at 0000, 0600, 1200, 1800 UTC
4	Trend forecast Interval of issuance	NIL
5	Briefing/consultation	Available at Aviation Meteorological Office for 24 hours, if required
6	Flight documentation Language(s) used	Aerodrome forecasts (TAF code form), SIGWX charts, WINTEN charts, SIGMET information in English
7	Charts and other information available for briefing or consultation	Analysis charts (surface and upper air), Prognostic charts, Graphic displays and other model outputs
8	Supplementary equipment available for providing information	Satellite and Weather radar imageries
9	ATS units provided with information	FIC, TWR and APP
10	Additional information (limitation of service, etc.)	All observation data, model outputs and forecasts produced by KMA and WAFS are available at the office through internet link. Apron Automated Meteorological Observing System(AMOS) equipment unserviceable. TOWER or APPROACH control AMOS information available.

RKPK AD 2.20 LOCAL AERODROME REGULATIONS

1. Airport regulation

- 1) Gimhae International airport is jointly operated by MOLIT and ROKAF. All aircraft that wish to use this AD have to observe the Gimhae Airport Local Regulations. Information about local regulation can be obtained from the TWR (ROKAF*) and Aeronautical Information Service Office (MOLIT**).

* ROKAF : Republic of Korea Air Force

** MOLIT : Ministry of Land, Infrastructure and Transport

- 2) All aircraft should taxi at speeds of less than 20 kt on Taxiway P to ensure safety. But ATC should order more than 20 kt for traffic flow management.

Change : Information of KMH VOR/DME remarks for VOR/DME unserviceable area.

- 3) GIMHAE Airport Runway strip is not satisfied with ICAO Safety standard at the moment. Therefore, refer to the following advice for the aviation safety. If the value of the surface friction measurements is less than 0.2, refrain from the aircraft operation.
- 4) All jet aircraft with code letter "C" shall follow the dotted lead-in line for the ACFT stand NR. 31 or 37.
- 5) All aircraft except jet aircraft with code letter "C" shall follow the dotted lead-in line for the ACFT stand NR. 41.
- 6) Flight limitations
 - The use of airport for training purpose is prohibited. The deliberate simulation of engine failure is not permitted whilst on approach to or departure from the airport.
훈련목적의 공항 사용은 금지된다. 김해공항으로 접근 또는 출발시 엔진failure와 같은 고의적인 모의훈련은 허가되지 않는다.
 - The use of this airport by light sports aircraft, ultra-light vehicles and lighter than air is prohibited.
경량항공기, 초경량비행장치 및 기구 사용은 김해공항에서 금지된다.

2. Apron control services

GIMHAE APRON provides ATC clearance delivery to aircraft and issues instructions, approval, and/or necessary information to aircraft, vehicles, and personnel within the domestic apron, international apron 1 and 2 areas.

3. Departure Procedure

3.1 ATC clearance

Departing IFR flights shall contact GIMHAE Delivery(121.725 MHz) to obtain ATC clearance at least 5 minutes prior to push back.

3.2 Procedures for start-up and push back

- 1) When ready to push back, aircraft contact GIMHAE APRON and provide the following:
 - a. Call sign
 - b. Gate or stand number
 - c. Release time(if necessary)
- 2) Ground crews (Ground handler, aircraft maintenance) must ensure that the area behind the aircraft shall be clear of vehicles, equipment and other OBST prior to engine start-up or aircraft push back for smooth and safety aircraft movements.
- 3) A pilot shall confirm with ground crews (Ground handler, aircraft maintenance) whether there is no hazard to the aircraft starting up. The pilot shall not ask an GIMHAE APRON for engine start-up and push back until its safety check-up is fully confirmed. If there is any elements posing a potential failure, the pilot shall ask the GIMHAE APRON for push back only. After moving and standing the aircraft at a safety area, the pilot can ask the engine start-up.
- 4) All aircraft to be taxied within the Apron shall fix their engine thrust on an Idle. In case of using breakaway thrust, it should be used to a minimum.
- 5) The following table describe the procedures for the pushback of aircraft from the various aircraft stands. When it becomes necessary to vary a procedure to expedite aircraft movements, GIMHAE APRON CONTROL will specify instructions to the pilot.

Aircraft stands	Pushback Procedures	Phraseology
1 - 10, 19 - 29	The ACFT shall be pushed back to face south (or north)	Push back approved, to face south (or north)
11	The ACFT shall be pushed back till its nosewheel is at the start point 4 (or pushed back to face north)	Push back approved, to start-point 4 (or to face north)
41	The ACFT shall be pushed back and towing forward till its nosewheel is at the start point 1	Push back approved, to start-point 1
12, 31 - 38, 42 - 48	The ACFT shall be pushed back till its nosewheel is at the intersection of lead-in line and taxi lane	Push back approved
52, 55 55L, 55R	The ACFT shall be pushed back till its nosewheel is at the start point 2(or 3)	Push back approved, to start-point 2(or 3)
53, 53L, 53R, 54, 54L, 54R	The ACFT shall be pushed back till its nosewheel is at the start point 2	Push back approved, to start-point 2
51, 58, 58L, 58R	The ACFT shall be pushed back till its nosewheel is at the start point 3	Push back approved, to start-point 3
51L	The ACFT shall be pushed back till its nosewheel is at the start point 3	Push back approved, to start-point 3
	When 51R stand is occupied by ACFT with a wingspan less than 17.01 m or unoccupied, self-maneuvering is permitted for ACFT with a wingspan less than 17.01 m	-
51R	The aircraft shall be pushed back till its nosewheel is at the start point 3	Push back approved, to start-point 3
	When 51L stand is occupied by ACFT with a wingspan less than 17.01 m or unoccupied, self-maneuvering is permitted for ACFT with a wingspan less than 17.01 m	-
57	The ACFT shall be pushed back till its nose-tip is crossed east side of GSE road and faces west	Push back approved, to face west

3.3 Departure routes and Radio Frequency Transfer Point (RTP)

1) Unless otherwise instructed, aircraft should use the following routes:

Apron	RWY in use	Route		Apron FREQ	R.T.P.		Ground FREQ
		Fixed wing	HEL		Fixed wing	HEL	
Domestic, International 1 and 2	36L	G8, G11	G7, G11	121.65 MHz 317.45 MHz	G8(hold line), G11(hold line)	G7(hold line), G11(hold line)	121.9 MHz 275.8 MHz
	36R	G8, G10			G8(hold line), G10(hold line)		
	18L	G7, G9			G7(hold line), G9(hold line)		
	18R	G7, G9			G7(hold line), G9(hold line)		

2) Aircraft will normally be transferred to GIMHAE GROUND prior to the RTP. Unless otherwise directed, aircraft may automatically contact GIMHAE GROUND at the RTP.

3) Aircraft shall not proceed beyond the RTP without clearance from GIMHAE GROUND.

3.4 The procedures of using Taxiway

Unless otherwise instructed, aircraft should use the following routes:

- RWY 36L in use : Apron - P - S or E5 - C7
- RWY 36R in use : Apron - P - E5
- RWY 18L in use : Apron - P - E1
- RWY 18R in use : Apron - P - E1 - C1
- When necessary, aircraft obtained intersection take-off clearance from the TWR may proceed to RWY through Central taxiway
- Aircraft standing on KAL parking area (PDM) located in the west part of AD shall proceed to RWY through "W2" or "W3" taxiway.

4. Deicing Operations

- Deicing Pad is located on G8, G9(Enable up to B-747), Aircraft stand 26 and Aircraft stand 27.
- Deicing Pad Operation
 - Aircraft Operator has to notice to the Ground Operator When he/she wants to use Deicing Pad.
 - Ground Operator has to notice to the relevant government as Operation Procedure.
 - When using a Deicing Pad, notice to the GIMHAE APRON(121.650 MHz) Before Pushback (Verify Completion Ready for Departure).
- Deicing Pad Movement
 - Aircraft Operator has to maintain a communication system which is connecting with Deicing Working.
 - If an aircraft which has Deicing on G9, GIMHAE APRON has to notice to all aircraft which is taxiing through the G10, G11.

5. Arrival Procedure

5.1 The procedures of using Taxiway

Unless otherwise instructed, aircraft should use the following routes:

- RWY 36L in use : C1 - E1 - P - APRON / C2 - E2 - P - APRON
- RWY 36R in use : E1 - P - APRON / E2 - P - APRON
E3 - P - APRON
- RWY 18L in use : E4 - P - APRON / E5 - P - APRON
- RWY 18R in use : C5 - E4 - P - APRON / C6 - E5 - P - APRON
C7 - E5 - P - APRON / S - P - APRON
- When necessary, other taxiway can be used under TWR permission.

Change : Information of call sign for facilities(GIMHAE APRON, GIMHAE GROUND).

5.2 Arrival routes and Radio Frequency Transfer Point (RTP)

1) Unless otherwise instructed, aircraft should use the following routes:

Apron	RWY in use	Route		Ground FREQ	R.T.P.		Apron FREQ
		Fixed wing	HEL		Fixed wing	HEL	
Domestic, International 1 and 2	36L	G7, G10	G7, G11	121.9 MHz 275.8 MHz	G7(hold line), G10(hold line)	G7(hold line), G11(hold line)	121.65 MHz 317.45 MHz
	36R	G7, G9			G7(hold line), G9(hold line)		
	18L	G10			G10(hold line)		
	18R	G10			G10(hold line)		

2) Aircraft will normally be transferred to GIMHAE APRON prior to the RTP. Unless otherwise directed, aircraft may automatically contact GIMHAE APRON at the RTP.

3) Aircraft shall not proceed beyond the RTP without clearance from GIMHAE APRON.

5.3 Follow-me car service

1. Follow-me service is available to arriving aircraft. Pilot should make the request to GIMHAE GROUND or GIMHAE APRON.

2. Aircraft shall monitor the appropriate GIMHAE GROUND and/or GIMHAE APRON frequencies while taxiing.

6. The code letter F aircraft ferry flight operation procedure into Korean Air Tech-Center

6.1 Taxiing procedures are as follows:

1. DEPARTURE

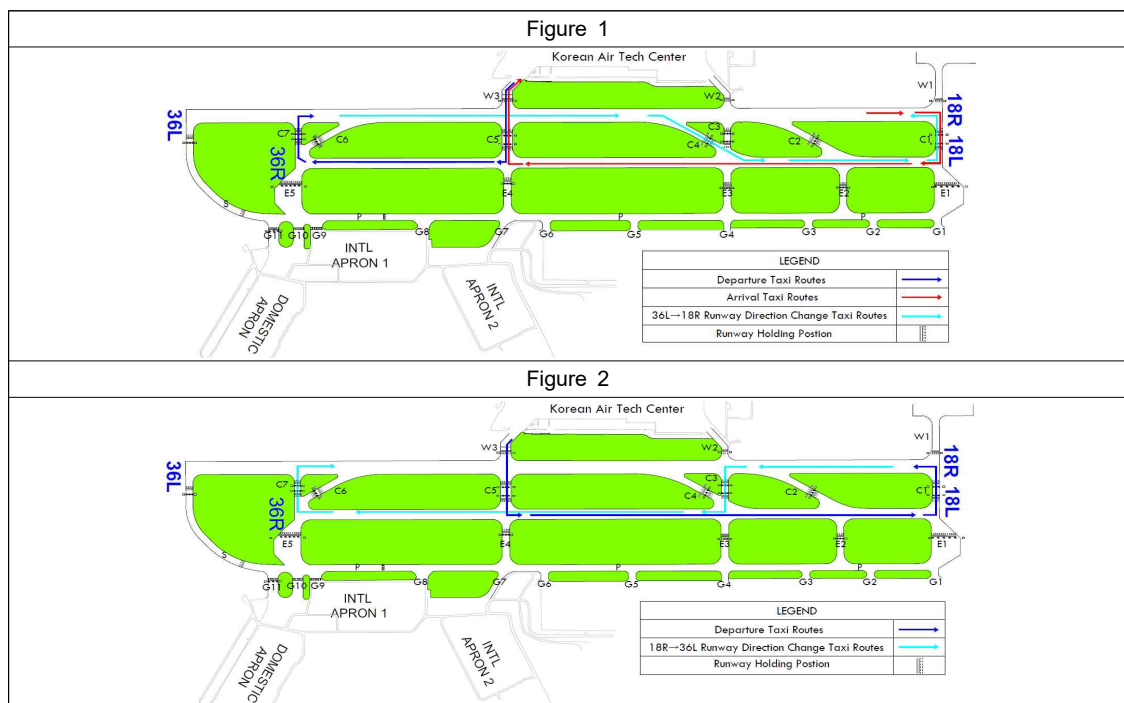

- RWY 36L in use : Korean Air TECH CENTER → W3 → C5 → RWY 36R/18L → C7(See Figure 1)
- RWY 18R in use : Korean Air TECH CENTER → W3 → C5 → RWY 36R/18L → C1(See Figure 2)

* In case of Departure RWY changed while lining up on RWY

- RWY 36L in use : RWY 18R → C3 → RWY 36R/18L → C7(See Figure 2)
- RWY 18R in use : RWY 36L → C4 → RWY 36R/18L → C1(See Figure 1)

2. ARRIVAL

- RWY 36L in use : C1 → RWY 36R/18L → C5 → W3 → Korean Air TECH CENTER
- RWY 18R in use : N/A

Change : Information of call sign for facility(GIMHAE APRON).

6.2 Restriction

- 1) Operation of The code letter F aircraft is only permitted for ferry flight into Korean Air Tech-Center (Maintenance facility).
Carrying passenger or cargo is prohibited.
- 2) For the code letter F aircraft, Circling approach to RWY 18L/R is not permitted.
- 3) When The code letter F aircraft takes off or lands on RWY 36L/18R, RWY 36R/18L is used as an alternative taxiing route.
- 4) The code letter F aircraft taxiing limitation
 - a. While operating, pilot shall use a digital auto-landing or flight direction guidance system to monitor and control the operation
 - b. While taxiing, The code letter F aircraft shall maintain ground speed at or below 10 knots, and set engines as follow :
- DEPARTURE AND ARRIVAL : Set No. 1 and 4 engines on IDLE
 - c. While taxiing, The code letter F aircraft shall not be permitted to hold short of RWY. Otherwise, It is not be permitted to land on the RWY for any other aircraft.
 - d. The code letter F aircraft shall follow the designated taxiing route.

7. Ground engine check procedure

Aircraft requiring an engine check shall contact GIMHAE APRON on the appropriate frequency and provide the following.

- a. Call sign or registration number
- b. Stand number
- c. Type of request, engine start or performance check

7.1 Engine start

Engine start is permitted in the apron areas. However, the power setting(s) shall not exceed idle thrust.

8. Helicopter Ground Operations

8.1 Helicopter shall comply with the following while in ground operation

- 1) Use caution to vehicles or people on the nearby GSE road during entering a helicopter stand.
- 2) Only wheel-type helicopter could use a helicopter stand. Skid-type helicopter needs to contact the airport operator before using an aircraft stand.

8.2. Engine start-up or Ground taxiing for departure is prohibited under following conditions (except towed movement without operating an engine)

- 1) Simultaneous operations with a nearby helicopter stand.
- 2) While an helicopter is entering into a nearby helicopter stand.
- 3) While following ground handling services are in progress in a nearby aircraft stand.
 - a. Re-fueling.
 - b. (Dis)embarkment of passenger.
 - c. (Dis)embarkment of freight.
- 4) While push-back is in progress for an aircraft in stand 58L.

9. CAT II Operations

9.1 General

Gimhae International Airport RWY 36L has ILS CAT II equipments.

Low visibility Procedures are established for operation in a visibility of less than RVR 550 m or a cloud ceiling of less than 60 m (200 ft).

1. Low visibility operations will be initiated by broadcasting "ATC LOW VISIBILITY PROCEDURES ARE IN OPERATION" via ATIS and/or appropriate radio frequencies.
2. Low visibility operations will be terminated by deleting the above mentioned message from ATIS and/or broadcasting "ATC LOW VISIBILITY OPERATIONS ARE TERMINATED" via appropriate frequencies.

Change : Withdrawal of engine performance check.

- 9.2 Aircraft operator must obtain the approval from Administrator of Busan Regional Office of Aviation prior to conducting any low visibility operations at Gimhae International Airport.

1. Approval for CAT II Operations

- a. Aircraft operators and pilots who wish to conduct ILS CAT II operations at Gimhae International Airport shall conform with certain requirements. Details of these requirements are published in Aviation safety Act, Article 67 and its Enforcement regulations Article 189, which are available from :

Flight Operations Division
Busan Regional Office of Aviation
108, Gonghangjinip-ro, Gangseo-gu, Busan,
46718, Republic of Korea

Tel : 82-51-974-2156~8
Fax : 82-51-971-1219

- b. Foreign operators may obtain the approval from Administrator of Busan Regional Office of Aviation by providing the following information to Administrator of Busan Regional Office of Aviation

- 1) Aircraft type and register number;
- 2) The Category II minima under which they intend to operate; and
- 3) A copy of the category II certification issued by their own category authority.

- 9.3 Pilots shall be informed when:

1. Meteorological reports preclude ILS CAT I operations;
2. Low Visibility Procedures are in operation;
3. There is any unserviceability in a promulgated facility so that they may amend their minima.

- 9.4 When informed the failure of Surface Movement Radar (SMR), pilots should anticipate that considerable spacing between the aircraft may be required.

- 9.5 Pilots who wish to carry out an ILS CAT II approach shall inform Approach Control on their initial contact.

9.6 Special Procedures and Safeguards

General Special procedures and ground safeguards

Special procedures and ground safeguards will be applied during CAT II operations to protect the aircraft from operating in low visibility and to avoid interference with the ILS signals in accordance with the provisions of ICAO Doc. 9365 - Manual of All Weather Operations, and the provisions of the Enforcement Regulations of Aviation Safety Act, Article of 248.

1. Arriving Aircraft

- a. Aircraft shall vacate the runway via the designated exit taxiways as follows :
RWY 36L - C1,C2,C3,C4,E1,E2,E3,P (Refer to RKPK AD 2-15)
- b. Pilots are required to make a 'runway vacated' call, when entire aircraft has cleared the ILS critical sensitive areas.

2. Departing aircraft

aircraft shall normally enter the runway via the designated taxiways as follows :
RWY 36L - G8,G11,P,S (Refer to RKPK AD 2-16)
RWY 36R - G8,G10,P,E5 (Refer to RKPK AD 2-17)
RWY 18L - G7,G8,G11,P,E1 , RWY 18R - G7,G8,G11,P,E1,C1 (Refer to RKPK AD 2-18)

3. Unless otherwise cleared by ATC, all aircraft should be restricted to taxi within the apron in a visibility of less than RVR 350 m.

4. Refer to paragraph 6 of RKPK AD 2.20 for the taxi procedures of the code letter "F" ferry flight aircraft.

9.7 Practice Approaches

Pilots may carry out the practice of ILS CAT II approach at any time with a prior approval from ATC, but the full safeguarding ground procedures shall not be applied and pilots should anticipate the possibility of ILS signal interference.

RKPK AD 2.21 NOISE ABATEMENT PROCEDURES

1. Night Flight Restriction (Curfew) for noise abatement
All civil aircraft take-off and landing are restricted from 1400UTC to 2100UTC, For a dispensation to be granted, the following criteria would need to be satisfied in exceptional circumstances for an aircraft to operate during the curfew. Any applications for dispensation will be considered for 1.2 and 1.4 between 1400UTC and 1430UTC for the flight scheduled to depart from the airport before the start of the curfew period.
 - 1.1 According to Article 234(1) stipulated in the Ministerial Regulation of Republic of Korea, aircraft undergoing emergency(including illegal interference acts) or suspected such situation considering the situation.
 - 1.2 Deboarding of emergency patients in the aircraft departing from, or landing on the airport.
 - 1.3 Arriving or departing aircraft used for national event.
 - 1.4 Re-screening of passengers and/or baggage for aviation security purpose.
2. Aircraft Operating Procedures(Except helicopter)
 - 2.1 Take off
 - 1) NADP 1(RWY 36)
All departing aircraft should apply ICAO PANS-OPS(Doc 8168) Volume I Noise Abatement Departing Procedures One(NADP ONE).
 - a) Thrust Reduction at 1 500 ft above aerodrome elevation is recommended.
 - b) Whenever practicable, all departing aircraft should climb with the aircraft's certified maximum climb gradient until reaching 3 000 ft AGL.
 - 2.2 Approach
For noise abatement using a delayed/reduced flap setting landing procedure is recommended. However use of this procedure is subject to captain's decision and safety prevail at all times
 - 1) Delayed/Reduced Flap setting Approach
All arriving aircraft shall apply the Delayed/ Reduced Flap setting approach as follows;
 - a) At IKHE/ IKMA 9 DME, lower gear, and,
 - b) While making ILS RWY 36R approach;
 - Maintain intermediate flap setting until passing IKHE 8 DME.
 - At IKHE 8 DME, set flap for landing.
 - c) While making ILS RWY 36L approach;
 - Maintain intermediate flap setting until passing IKMA 8 DME.
 - At IKMA 8 DME, set flap for landing.
 - 2) Circling Approach RWY 18L/R
 - a) When conducting a circling approach to land RWY 18L/R, it is recommended that all aircraft avoid flying north of Namhae expressway for noise abatement except for aircraft in an emergency or in an unavoidable situation and helicopters.

Change : Information of circling approach and Amended phrase.

b) Display for RWY 18R PAPI Direction Adjustment Light

PAPI on the left of RWY 18R provides signals in the same direction of the RWY 18 extension line for ACFT on the final, but PAPI on the right of RWY 18R is offset by 12 degrees to the west for ACFT on the base leg in order to approach effectively.

2.3 Between 1200UTC and 2200UTC, pilots are requested to limit the use of reverse thrust to idle reverse after landing RWY 36L except for operational or safety reasons.

2.4 Exemption

- 1) Aircraft unable to comply with the procedures described in paragraph 2.1, 2.2 and 2.3 above for any reason should inform ATC.
- 2) Aircraft need not to be complied with the procedures described in paragraph 2.1, 2.2 and 2.3 above in adverse operating conditions such as;
 - a) if the runway is not clear and dry. i.e. it is adversely affected by, snow, slush, ice, water or other substances;
 - b) in conditions when the ceiling is lower than 500 ft, or when the horizontal visibility is less than 1 900 m.
 - c) when the cross-wind component, including gusts, exceeds 15 kt.
 - d) when the tailwind component, including gusts, exceeds 5 kt.
 - e) when the wind shear has been reported or forecast, or thunderstorms are expected to affect the approach.

3. Runway Operation

1. Preferential runway

For noise abatement, landing onto or take-off from RWY 36L is recommended.

2. Intersection Take-off

Runway 18L/R Intersection take-off is recommended except in unavoidable cases for traffic flow or other reasons.

4. Operational Limitations

1. Engine run-up tests

- a) Engine start is permitted in the apron areas only. However, the power setting(s) shall not exceed idle thrust.

RKPK AD 2.22 FLIGHT PROCEDURES

1. IFR Procedure

1.1 Take-off weather minima

ENG	RWY 18L/R	RWY 36L/R	For filling as Alternate	
			Precision	Non-precision
1	100 ft – 350 m		A	800 ft - 3 200 m
2			B	
3			C	
4			D	1 100 ft - 4 800 m

1.2 Fuel dumping area

1. Area : A circle, radius 3 NM centered at R100 PSN/16 DME

2. Altitude

- a. IFR aircraft : 6 000 ft AMSL
b. VFR aircraft : 4 000 ft AMSL

1.3 Speed restrictions

- All aircraft shall not exceed 250 kt IAS below 10 000 ft AMSL in GIMHAE TMA, unless otherwise authorized by ATC. If the minimum safe speed is greater than 250 kt IAS, the aircraft may maintain the minimum safe speed without ATC authorization.
- When ILS RWY 36L/R approach in use, civil aircraft should comply with following speed restrictions. if not to comply with speed restrictions, ATC may instruct speed restrictions.
 - Initial approach phase : 220 kt IAS or above
 - Base leg/Heading to final approach : 180 kt IAS – 220 kt IAS
 - Established on final approach to 8 DME : 160 kt IAS – 180 kt IAS
- When ATC use “NO [ATC] SPEED RESTRICTIONS” RTF phraseology, pilot shall note that all speed control restrictions are cancelled and preferred speed may be flown without any speed restrictions.
- When ATC use “RESUME NORMAL SPEED” RTF phraseology, pilot shall note that the previously issued speed restriction by ATC is cancelled but comply with GIMHAE TMA speed restriction(MAX 250 kt IAS below 10 000 ft).

2. VFR Procedure

1. VFR weather minimum

- Ground visibility : Not less than 3 SM
- Flight visibility : Not less than 5 SM
- Ceiling : At or above 2 500 ft

2. VFR weather minimum for special mission helicopter

- Ground visibility : 2 SM
- Ceiling : 1 000 ft

3. VFR Pattern Altitude

- Helicopter : 600 ft
- Conventional : 1 000 ft
- Jet : 1 500 ft

4. Special VFR

- In Gimhae international airport, a special VFR operation is not applied to all aircraft.

Change : Withdrawal of engine performance check.

3. Radar Procedure

3.1 PAR Approach

1. RWY 36L(Straight-in)

CAT	GS/TCH(ft)/RPI(ft)	DA(ft)/VIS(m)	DH(ft)	Ceiling(ft)
A, B	3.0°/57/1 070	213/RVR 550 VIS 800	200	200
C, D		213/RVR 730 VIS 800	200	200
When TDZ/CL INOP, Increase CAT A, B RVR to 730 m. When ALS INOP, VIS 1 200 m and RVR to 1 220 m.				

a. MISSED APCH PROCEDURES

- At DH climb HDG 310 to 4 300 ft and directed by ATC.
- Missed APCH climb rate exceed 340 ft/NM.

4. RADIO COMMUNICATION FAILURE PROCEDURE

4.1 IFR

1. General

- No person may take off unless two-way radio communications can be maintained with the Air Traffic Control.
- On recognition of communication failure during flight, squawk 7600 and if necessary to ensure safe altitude, climb to Minimum Safe Altitude or above to maintain obstacle clearance. Then comply with following procedure.

2. VFR condition

If the failure to radio communication occurs in VFR conditions, or if VFR conditions are encountered after the failure, a pilot shall continue the flight under VFR and land as soon as practicable based on the runway in use.

3. IFR condition

If the failure occurs in IFR condition, or if the requirements specified in paragraph 2 of this section cannot be met, a pilot shall continue the flight according to the following procedures :

A. DEPARTURE

a. Under Pilot Navigation

- Follow the SID with altitude/flight level assigned at the last ATC clearance received.

b. Under Radar Vectoring

- 1) Proceed by the direct route from the point of radio failure to the fix, route, or airway specified in the vector clearance;
- 2) In the absence of an assigned route, proceed by the route that ATC will advise through the forthcoming clearance; or
- 3) In the absence of an assigned route or a route that ATC will advise through the forthcoming clearance, proceed by the route filed in the flight plan; and
- 4) Maintain minimum enroute altitude(MEA) or the altitude/flight level cleared in the last ATC clearance received, whichever is higher, for 20 minutes; then
- 5) Continue the flight with altitude/flight level filed in the flight plan

B. ARRIVAL

- a. Proceed to GEOJE IAF or NARAE IAF or GAYHA IAF or KEVOX IAF or PEDLO IAF whichever is nearer at the last assigned altitude or the minimum altitude of IAF whichever is higher and hold; then
- b. Execute Instrument Approach as close as possible to the expected further clearance time (EFC) issued by ATC or estimated time of arrival (ETA) filed in the flight plan; and
- c. Land, if possible, within 30 minutes after ETA or the last acknowledged EFC or ETA, whichever is later.

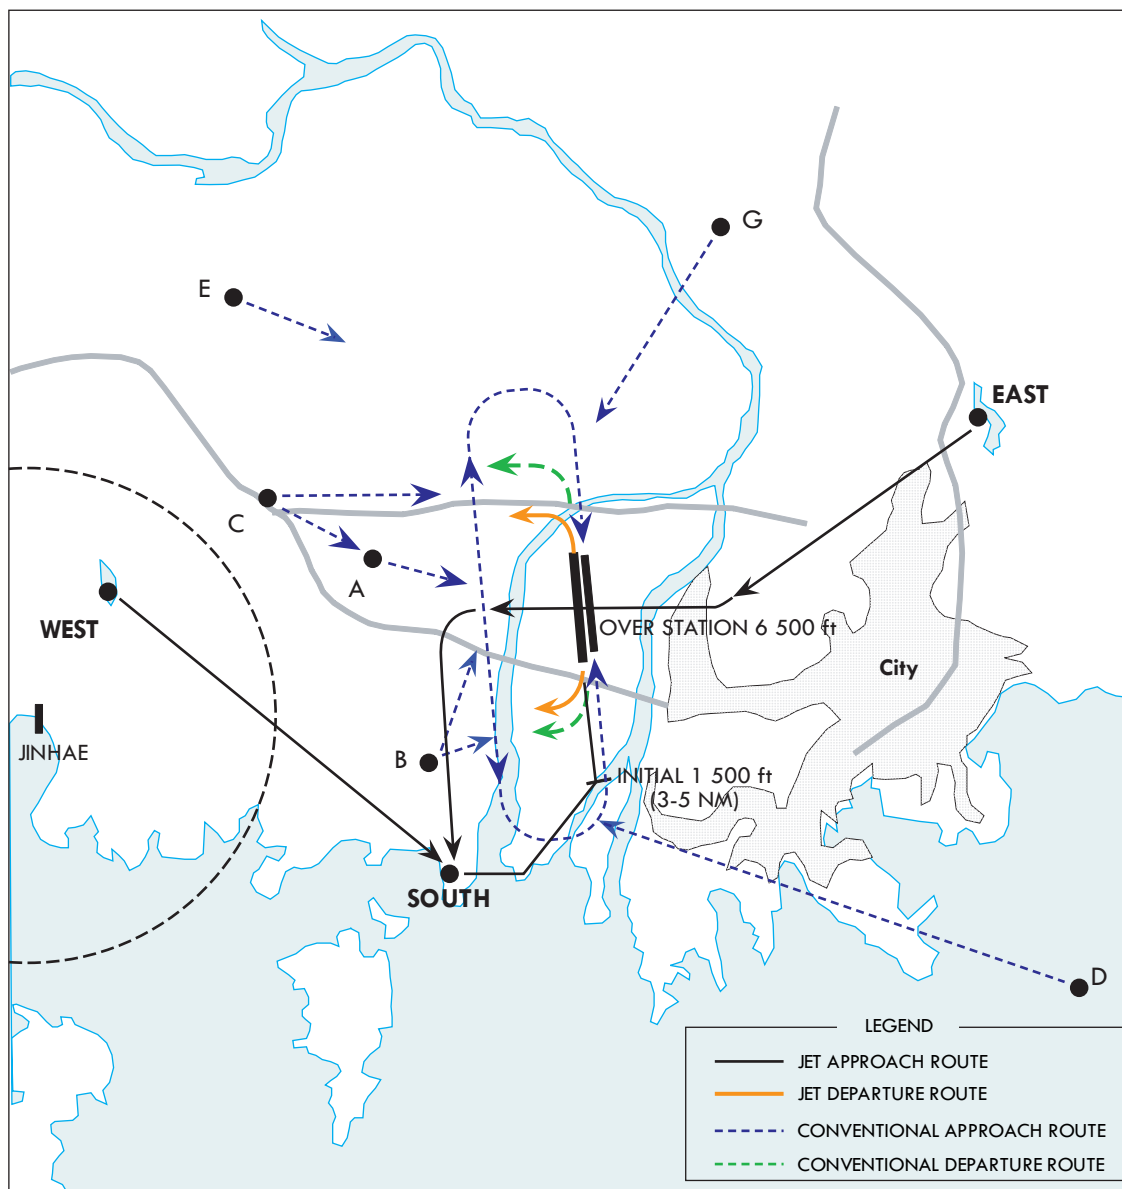

4.2 VFR

VFR flight which has experienced radio communication failure shall

- Squawk Mode 3/A code 7600, and
- When able to see light gun signal of control tower, follow that instruction
- If unable to see light gun signal of control tower, hold on downwind until ETA or for 10 minutes, whichever is longer, then
- Aircraft on west pattern should land on RWY in use
- Pilot shall use caution traffic landing and take-off from/to runways.

Change : Information of fix name(ZULBI → KEVOX).

VFR Procedure and Traffic Pattern

Reporting Point	Geographical Name	Position	Coordinates	Remarks

RKPK AD 2.23 ADDITIONAL INFORMATION

1. The characteristics of Gimhae international airport

a. Topographical

Gimhae international airport is surrounded by mountains except the South part of the area.

b. Airspace

Pilots are required to keep strict aerial watch for following reasons ;

- Numerous helicopters flying between Jinhae airfield and US army airfield located in Busan city cross south of Gimhae international airport at any time.
(When necessary, traffic information and radar service are available at the pilot's request)
- Several Radio antennas are on the northwest of the airport.

c. Weather

- Due to seasonal wind conditions, RWY 36 is usually used in winter while RWY 18 in summer.
- Being adjacent to the sea, sea fog often occurs.
- When low level clouds much moves in the southwest of airport, the chance of rain gets higher.

d. Bird concentrations in the vicinity of airport

Due to bird habitats in airport, pilots shall exercise caution not to conflict with the birds.

- From January until February, and from November until December, resident birds such as skylarks move in and out of agricultural area near the airport. Also, from January until March, and from October until December, birds like mallards fly from resting area (approximately 1~3 km around the Runway 18R threshold) to feeding area(farmlands or airport). Besides, from April until September, birds which are mainly white-plumed egrets and grey herons move out from the airport to resting area(approximately 1~3 km around the Runway 36L threshold) at noon, and then from one to two hours before sunset, birds return to the airport from same resting area.
- The activity altitude of birds is from 0 to 2 000 ft (600 m). Also, before daily sunset, activities of the birds occur above the same way when returning to the resting area for one or two hours.
- Control tower shall offer pilots information about the birds's movement.
- Especially, during that time, control tower shall keep pilots informed that landing lights of aircraft are needed to turn on when take-off and approach for landing.
- Furthermore, preventive activities against bird strikes, such as operation of B.A.T (Bird Alert Team) and devices (cannon, shotgun, etc) which scare birds away, shall be carried out. Also, the measures for eliminating resting or feeding area of birds is being taken in the airport boundary, although insufficient. The measures are as followings : spraying plants with insecticide and eliminating waterway or puddle, improving methods of waste disposal from airport.
